INDONESIA YOGJAKARTA 13th to 16th of January 2010

PARTICIPANTS, OUT-COMES AND DEVELOPMENT

Mr Mulhendra started Slalom paddling 1 year ago. He was invited for Preparation camp in Xiasi for Asian Continental 2010 (May 2010) and ICF Slalom Camp in Thailand * (December 2010).

He organised a Slalom introduction training camp and a competition in his home-town (Yogjakarta). His will is to create a Slalom group among the paddlers of his university and thanks to that drag paddlers from the state into Slalom canoeing.

He is a member of PODSI local Yogjakarta and he is the most active people I've ever met in Indonesia in terms of Slalom. He was help in achieving his project by Mr

A. Participants

The gathered students were 30 from 3 different universities. Some of them attended the 1st Slalom camp made early 2010. Some were real beginners in Slalom. Then, these "experts" and I shared the group and on and on, I was helping them leading from the background.

All paddlers had shown a great interest and a strong motivation. I have no doubt about the magnet effect and the determination from Indonesian paddlers to step into Slalom (already underlined in my 1^{st} report last year).

All was organised in the main pound of the Zoo of Yogajakarta

B. Schedule and equipment

The equipment was mainly from the ICF donation and some plastic creek boats from local paddlers..

1. Schedule

Friday: A time about teaching slalom basics and level 1. The already experienced paddlers gave a strong support as "coaches". We organised 2 groups: beginners and experienced.

Saturday: Same organisation as Friday

Sunday: This day was dedicated to the competition.

In order to promote for the introduction of Slalom in SEA Games, the morning was a head2head Slalom and afternoon a "classic" Slalom.

Main targets of the camp

- Working on technical skills
- Paddling different boats (K1, C1, C2)
- · Reading of the streams and adaption skills
- Writing training diary

The presence of Jean-Yves Cheutin, French national coach, during this camp as second coach

C. Out-comes

2. <u>Composition of the group</u>

One can design 2 parts as beginners and experienced.

We use the expertise of the experienced people to support the beginners groups as much as possible. For instance, the experienced have now a sufficient knowledge in Slalom to present to the "beginners" some items of Slalom paddling as: judgement, warm-up, stretching, strength core

training...

3. About paddling different boats

I asked all paddlers to practice once in a while another type of boat. The target is to bring them to practice and compete in both categories.

They usually come from NF where few Slalom paddlers are practicing the discipline. Therefore, paddling in 2 different boats will upgrade their global paddling skills and on the other hand, they might register in 2 events for competing and offer their country twice more possible good results.

It is also to keep the line with the IOC recommendations and ICF international rules.

4. About a support in coaching

The support of another coach will probably become a must for 2 main reasons:

- The gap level between the 2 groups is getting wider then it is less easy to be present 100% for both groups
- The sharing of experiences and other technical views upgrade quite a while the global "teaching" received by the athletes

D. <u>Development</u>

1. Development in Thailand

It would be a must to have 2 places for Slalom training and competitions in Thailand. Nakkhon Nayok and Mae Tang river are complementary. It will worth to build up the national slalom competition activity thanks to these 2 headlights places.

The coordination of practicing on the 2 venues will for sure bring one step beyond the global level of Thai Slalom paddlers.

2. <u>Development in ICF policy</u>

The presence of a coach of international level should be one of the criteria in the organisation of such camps in the future. It could be coach from flagship countries in Slalom. It might be a plus if the coach is coming from the 2 top countries in Asia: China and Japan.

A suggestion is to sort the camps in 3 categories:

- Base: beginners in Slalom (eg: Nepal, Indonesia...)
- Mixte: beginners and experienced (eg: TIP camp in TPE 2009, THA 2010, preparation of Asian event combined with TIP)
- Experienced: TIP and Asian athletes competing at an international level (eg: Mihi, Gangzhou)

I would like to thank here and underline the strong support given by Mr Paraj, Mr Kikky and Mr Somyos. I sincerely wish to work again in cooperation with them.
