ICF Canoe Polo Scrutineering Guide for World Games

The following rules apply to the world games only

12.3.1 - Trademarks, advertising symbols and words must be identical and in the same position on the kayaks and clothing of all players.

12.3.2 - Any kayak, accessory, or article of sportswear, which does not comply with the conditions will be ineligible for use during a competition. Teams are responsible for ensuring their own equipment meets these rules and regulations.

In addition, the following is provided for clarity:

13.14.2 - On the kayak front deck, the area above the kayak seams and extending 35cm from the front of the cockpit is reserved for a boat sticker incorporating ICF logo, Event logo, Event sponsor logo with the option also of country code for teams. Should this area not be required by ICF/Organisers this will be notified via championship bulletin at least 3 months before the competition opening ceremony.

13.14.3 - On the front of the helmet an area 7cm x 4cm is reserved for an ICF or ICF Sponsor sticker. Should this area not be required by ICF/Organisers this will be notified via championship bulletin at least 3 months before the competition opening ceremony and athletes should apply their country flag to this area.

To help teams turn up to the event with correct equipment the following guidelines and clarifications have been put together.

Attention is drawn to:

“Trademarks, advertising symbols and words must be identical and in the same position on the kayaks and clothing of all players.”

If these are not the same, they must be covered with a high-quality vinyl or tape, that will be expected to last the duration of the competition.

“National Federations are responsible for ensuring their own equipment meets these rules and regulations.”

(Please read "16.11 - SCRUTINEERING - MAJOR COMPETITIONS")

For major ICF Canoe Polo events including World Championships and World Games, scrutineering of equipment will be a 3 - step process.

1. Cosmetic Tests

At the commencement of scrutineering, each team will present their equipment for checking. The whole team will have a visual check to ensure a high-quality uniform appearance of helmets, PFD's and kayaks. **Each failed item MAY be subject to a 50€ fine (as determined by the event organisers). This fine must be paid before rechecking will occur before progressing to Step 2.**

For multiple cosmetic test failures, the whole team will lose their scrutineering time slot and will return for rechecking at a later time. Rechecking will take place after all other teams have had their initial checks. Practice times will not be rescheduled.

2. Safety Checks

All kayaks, paddles and helmets will be subject to safety checks for sharp edges. These checks have NOT changed, and any failures will need to be rectified.

PFD's will be subject to padding thickness checks. PFD's will also be checked for number dimensions.

Each player will initially be required to wear his or her Helmet (with facemask). These will be checked for compliance with section **106** and for helmet number size.

The bumpers of EVERY kayak will be checked for condition- they must be correctly attached in new or near new condition and of the correct dimensions. **Any failures will be required to be replaced.**

All paddles will be checked for edge thickness, corner radius (30mm) and sharp edges. **Any failures will need to be rectified as these specifications have NOT changed.**

Any issues identified on any piece of equipment will be clearly noted on the team check sheet and initialled by the scrutineer. This issue must be rectified prior to the equipment moving onto the next stage.

3. Technical Checks

Note: due to wear and tear-Bumpers are a safety check not a technical check.

Any kayak with an ICF label may be selected for a random check with full gauges for the technical specifications. **Any kayak with an ICF label failing the technical specifications will be banned from use and the manufacturer will be asked to explain** - Note: severe penalties apply.

Any kayak without an ICF label is **not** allowed to be used during the World Games.

There is an area reserved for NF sticker.

Step 1 – Cosmetic Checks

This step will ensure all items of equipment are uniform in colour and decals for each team.

KAYAKS

Kayak checks will ensure any vinyl covering is of a high quality, with limited wrinkles and creases and will last the duration of the event. If vinyl covering is used it must uniform in colour and texture for the whole team.

Cosmetic Check FAIL- Vinyl covering must be smooth and done with care to match the whole team. Ensure a good professional look that lasts the whole event. 50€ fine would apply per kayak

Cosmetic Check FAIL- 2 kayaks with significant red showing and kayaks with different logos or decals above join line- 5 * 50€ fine would apply

THE WORLD GAMES
2025 CHENGDU

Scrutineer

Kayaks must be uniform in colour and logos above the edge (for World Games they must also be uniform below the edge). Clear finish must be uniform in terms of weave.

Cosmetic Check FAIL- The clear carbon boat looks different in colour - 50€ fine would apply

Cosmetic Check FAIL- 3 kayaks with different decals above join line- 3 * 50€ fine would apply

Cosmetic Check PASS- All kayaks, PFD's and helmets the same

BUMPERS

All kayaks of the same team should have the same colour bumpers, black is the preferred colour.

Cosmetic Check FAIL- Kayak with blue bumper 50€ fine would apply

All seams must be the same colour for each player in a team, if a player on the team has a seamless boat, then this is the only exception:

Yellow (Kevlar) Seam	Black Seam	No Seam	
			
			
			
			

THE WORLD GAMES
2025 CHENGDU

Scrutineer

The hull of the kayak for all players in a team must be the same colour, if a clear gelcoat is present then the colour of the material (Carbon, Kevlar or Carbon/Kevlar) underneath is not important.

Player 1	Player 2	Player 3	Player 4/5/6	
				
				
				
				
				
				
				

HELMETS

Helmets must be of a uniform solid base colour- the practice of covering a helmet with strips or sections of vinyl or tape is no longer acceptable. Several teams have asked about clear gel and the types of weave, also if they are allowed to have a mix of clear gel and colour gel.

The following is acceptable:

Note the white Kevlar and white gel, from a distance they look the same – this interpretation will be applied at the World Championships.

The black helmets above are a mixture of weave and one black gel, this is acceptable once viewed from a distance and **will pass**.

The manufacturers logo does not need to be covered as long as it is similar in size to the ones below.

THE WORLD GAMES 
2025 CHENGDU

Scrutineer

Helmet numbers must be the minimum size of 75mm high and be a clearly contrasting colour and font size to stand out from a distance. Helmet numbers must be cut from one piece of vinyl. Strips of tape or vinyl to create numbers is no longer acceptable.

Cosmetic Check PASS- all helmets, kayaks and decals the same

All stickers and logos must be identical in size, colour and location. Previous events scrutineering stickers must be removed.

Cosmetic Check FAIL-
different logo's on each helmet 50 € fine per helmet.

THE WORLD GAMES
2025 CHENGDU

PFD

Body protection must be uniform in colour and appearance. Minimum number size Front 100mm and back 200mm.

Cosmetic Check FAIL- numbers the wrong size. 50€ fine would apply per PFD

Some manufacturers have been inconsistent when creating different sets of PFD's for National Teams. The 'band' at the bottom has been produced in different colours:

This is hidden in the normal paddling position, as seen in the second picture, therefore **will not result in equipment failure** during scrutineering.

TEAM COLOUR (Personal equipment)

If an athlete chooses to wear a bib-style deck it must be worn under the rash vest and not on top, as it would not align with the team uniform.

The rash vest ("Team Lycra shirt") must always be worn as the first layer directly under the PFD.

Step 2 - Safety Checks

This step will check all equipment for points of safety.

KAYAKS

Will be tested for sharp edges, rough surfaces and padding attachment.

Kayak padding must be in new or near new condition and in one homogenous piece firmly attached to the kayak with no loose edges or ends as per the specifications. No tape, wrapping, extra foam or other substances may be used to increase the padding profile or to ensure correct attachment!

Kayak padding (Bumpers) must be uniform (the same) colour for all members of the team.

Any padding failing Step 2 must be replaced with a new padding of the appropriate type to suit the kayak design before it will pass. It is recommended that teams or individuals carry spare sets of padding for each design (Minor repairs can be completed during the event with tape or wrapping)

PADLLES

Must have no sharp edges or loose tape. Edge thickness will be tested using the appropriate gauge. Edging materials such as Kevlar tape must be correctly attached with no loose edges.

Electrical tape or equivalent is no longer acceptable to make paddles thicker or to cover sharp edges as it is too easily removed or comes off.

If the paddle edge is damaged a more permanent solution such as Kevlar edging is required.

Epoxy repairs are allowed.

When using the gauge if a paddle is able to enter the slot and reaches the bottom, this will be classed as a fail.

“3.3.5. - Players may not apply any greasy substances to their equipment that change the frictional coefficient of the original surface.”

Wax will only be allowed on the paddle shaft, in an area that would be covered by the athlete's hand when paddling normally.

HELMETS

Must have a correctly fitting facemask that covers from the jawline to the temple. It must also comply with the regulations in section 16.9

**** Note **** A gap of less than 5mm between the top of the faceguard and the helmet will be allowed. The 5mm can be measured using the paddle gauge.

Fail - does not cover chin

Fail - does not cover chin

Fail – occipital bone not covered.

Recommended coverage

Red area: Helmet

Blue area: Facemask

Minimum coverage – note chin

The faceguard needs to be fitted so that a paddle cannot enter the gap between the face and faceguard when the head is tilted back.

Helmet bolts

Must not stick out too far or be dangerous (rusty, Bolt sticking out of nut and so on).

BODY PROTECTION (PFD)

All disciplines within the ICF are now required to have a rule which specifies the type of PFD that is allowed during competition, The rule for polo was updated as:

“16.10.1 - The body protection in the form of a Personal Floatation Device (PFD) must meet or exceed the current ISO 12402-5:2020 and carry the appropriate label.”

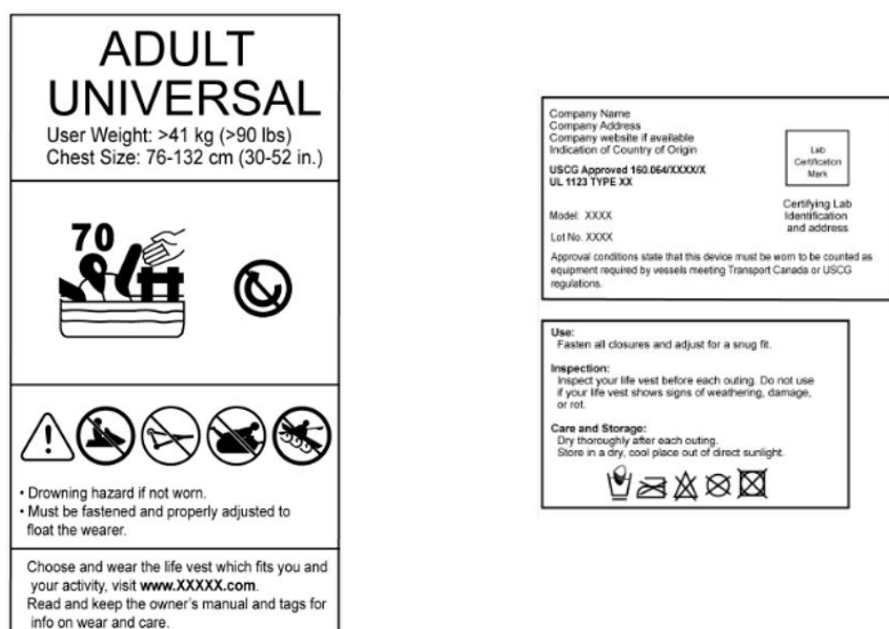

In Europe this means:

PFD/BA falls into Category 3 PPE (Personal Protective Equipment), third party testing is required before notification to the recognised body in each country. Finally, a 'Certificate of conformity' is issued at which point the equipment can be sold within the EU.

The PFD will carry a label similar to this:

In USA and Canada there is a similar system of testing. A PFD purchased from there will have a slightly different label:

THE WORLD GAMES
2025 CHENGDU

Scrutineer

The PFD must have the required thickness of **20mm** on the front, back and sides (See specification in section 16.10).

PERSONAL JEWELRY

As per rule 3.3.4 “a player must not wear any items (such as jewellery) that can endanger either the wearer or any other player”.

Step 3 - Technical Checks

This step will check the technical aspects of all equipment particularly the kayaks.

A reminder that all boats must now contain an ICF registered manufacturers sticker.

Any kayak failing any technical specifications will fail scrutineering and will not be able to be used in the event.

Appendix 2 Scrutineering

Stage 1 - Players are pre-checked wearing helmet for safety checks.
Volunteers take kayaks and equipment behind screens for cosmetic checks.

Paddles, Helmets, PFD's

Each kayak gets a scrutineering sheet attached to the seat to track progress

Stage 2 - Once cosmetic checks are passed all kayaks and equipment proceed to safety checks
(volunteers to help transfer items to new area)

Paddles

Helmets, PFD's

Stage 3 - Technical Checks. Kayaks checked for ICF Label, dimension and gauge tests

Dimension tests including
length, width, depth, radii

Dimension tests including
