II. ENTRIES FOR LEVEL 3 COMPETITION

The entries are open without limitation of the number of boats per event and per federation. However, The Host National Federation can limit the number of boats per event per Federation to not less than 6 boats per event. This must be recorded on the calendar when the entries open on SDP and included in the 1st information bulletin. Two weeks before the closing deadline, the limit will be reviewed and may be extended.

This rule means that:

- Each participating boat will gain International Ranking points.
- National Federations must do all of the entries through the ICF online entries system (SDP).

For 2020, ICF Canoe Slalom Committee limits each nation to hosting no more than two International ranking races (level 3) in any year.

III. ICF CANOE SLALOM RANKING LIST

The ICF Canoe Slalom Ranking List is established by taking the average of the best 5 ICF Ranking Points achieved by any competitor participating in the ICF Canoe Slalom Ranking Series of events.

Events included in the calculation of the ICF Canoe Slalom Ranking span a two-year period. Therefore, all races in the two-year period directly before the relevant release date are considered and the best 5 counted for each Athletes ranking.

Athletes having 5 or more results, whilst still averaging the best 5 results, are ranked above all Athletes having only 4 results; those with only 4 results are ranked above those with 3 results. Athletes with 3 results are ranked above Athletes with 2 results and Athletes with 1 result are ranked at the bottom of the list.

IV. ICF POINTS CALCULATION

A. Principle

ICF points are calculated separately for each phase (Heats, Semi final or Final) in which a boat participates. The lowest point value out of those 3 is the ICF points earned by the boat for that race.

B. General Formula for Race Points

$$\text{IcfPoints} = \text{PhaseOffset} + \frac{\text{PhaseFactor} \times \text{Score}}{\text{ScoreLeader}} - \text{PhaseFactor} + \text{QualityFactor}$$

- **Phase Offset**

Phase	PhaseOffset
Final	0
Semi final	10
Heats	20

- **Quality Factor**

- ICF competition Level 1 and Level 2

For ICF CSL World Cups, World Championships and Olympic Games the Quality Factor is "0"

- ICF competition Level 3

The "Quality Factor" is calculated by identifying the five (5) competing Athletes who are ranked highest on the ICF CSL Ranking list. The ICF Ranking points for these Athletes are averaged and this becomes the "QualityFactor" for that event.

Any entered boat who receives a DNS in both Heats runs will not be considered in the Quality Factor calculation.

- **Score:** results of the boat in seconds
- **ScoreLeader:** results of the fastest boat in that phase in seconds

C. Sample Calculation of IcfPoints

1. Example 1

- Competition phase → Final, therefore **Phase Offset = 0**,
- **PhaseFactor** = 150
- Competition is a World Championships, therefore **Quality Factor = 0**
- Boat 1 score = 89.60 seconds
- Boat 2 score = 90.82 seconds
- Boat 3 score = 141.91 seconds

*Points for Boat 1 (winner of finals) = $0 + ((150 * 89.6) / 89.6) - 150 + 0 = 0.00$ race points*

*Points for Boat 2 = $0 + ((150 * 90.82) / 89.6) - 150 + 0 = 2.042 = 2.04$ race points*

*Points for Boat 3 = $0 + ((150 * 141.91) / 89.6) - 150 + 0 = 87.572 = 87.57$ race points*

2. Example 2

- Competition phase = Semi Finals therefore phase offset = 10,
- **PhaseFactor** = 150
- Competition is a World Cup, therefore **QualityFactor** = 0
- Boat 1 score = 101.76 seconds
- Boat 2 score = 100.86 seconds
- Boat 3 score = 103.19 seconds,

*Points for Boat 1 = $10 + ((150 * 101.76) / 100.86) - 150 = 12.8256 = 12.83$*

*Points for Boat 2 (winner of the semi final) = $10 + ((150 * 100.86) / 100.86) - 150 = 10$*

*Points for Boat 3 = $10 + ((150 * 103.19) / 100.86) - 150 = 13.4561 = 13.46$*

For Boat 3 the semi final ranking points are better than ranking points they score in the finals phase due to a "50" second penalty received in the Finals, their semi final points would be used as their ranking points for this race.

The calculation of ranking points for the heats phase would follow the same formula as above using 20 as the Phase Offset.

D. Calculation of Points for Female Athletes during Pregnancy.

The points for an Athlete who becomes pregnant will be frozen at the value of the first release date following the time they cease competition. The Athletes points will remain at this value for the next 24-month period (8 ICF Ranking releases) and they will retain the ICF Ranking relevant to this point value.

The Athletes Federation must write to the ICF Secretary General and the Chair of the Canoe Slalom Committee to advise that their Athlete will not be competing due to pregnancy, what date they expect to cease competition and that they wish their ICF Ranking points to be frozen for up to a 24 month period. They must also provide a medical certificate confirming the pregnancy.

If the Athlete returns to competition within 24 months they will earn points and be newly ranked. Their new post pregnancy races will be used in the calculation of their ICF Ranking. In the first instance the points earned at their first post pregnancy race will be combined with the best 4 of their pre pregnancy races to produce a new ranking. Then the two new races plus their best 3 pre-pregnancy points etc. Once they have competed in 5 races post pregnancy their ranking will be calculated on these 5 races and all the points from the pre pregnancy races will be removed.

In all cases, 12 months (4 ICF Ranking releases) after the Athlete has recommenced competition all the points earned prior to the pregnancy will no longer be counted and will be removed. The ranking will be calculated on any points earned since returning to competition and the Athlete will be ranked accordingly.

If after 24 months (8 ICF Ranking releases) the Athlete does not return to competition the points earned from pre pregnancy races will be deleted and the Athlete will be removed from the ranking list at the next release date.
