SUBJECT	START OF TRAINING DELAYED ELECTRIC ISSUE AT THE VENUE
----------------	--

The ICF was informed few hours ago that an electric issue happened this morning at the venue.

The electrical company is already on it to fix it and will need to work tomorrow morning to fully repair it. They need to change part of the main power cable of the venue.

The HOC represented by his General Manager, M. Sebastian CUATTRIN will held a team leaders meeting tomorrow **(Thursday 13 September) at 11.00 at the venue** to update all NFs and give information about the start of the new training schedule.

In the best scenario, the training session may start Thursday 13 September at 13.00 or be postponed to Friday 14 September.

The transportation system remains available as planed and the athletes can train on the lake.

The HOC will do his best to solve quickly this issue with the local authorities.
