

OFFICIAL COMMUNICATION

Item – 2

SUBJECT WORKS and Water levels from June 17th till June 23rd

Dear Team Captains.

On behalf of the HOC and the ICF Freestyle Committee we want to update you with the following information about this coming week from June 17th till June 23rd.

WORKS ON THE RIVER :

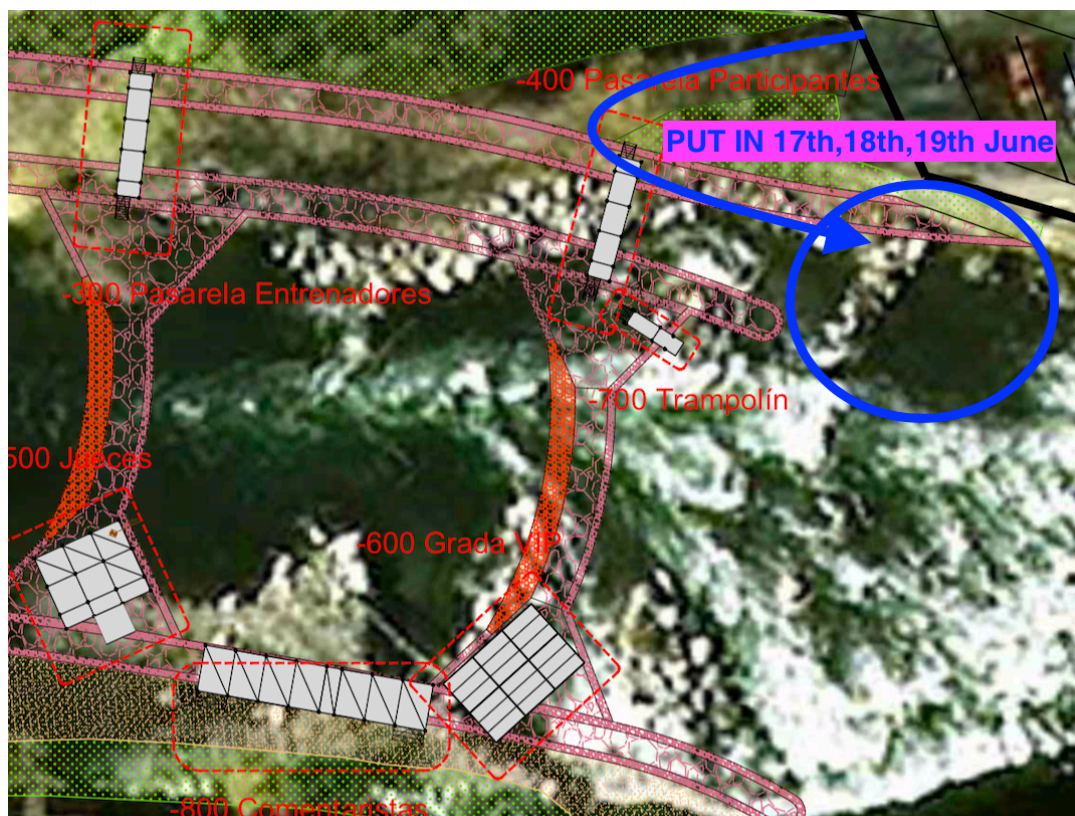

- River bank left
 - From 17th till 20th the river left river bank will be closed due to the final event site development work and also on Thursday 23rd the left river bank will again be closed as the VIP, ANNOUNCERS, and JUDGES platforms will be being built. We hope that by Thursday night this construction will be complete, if the schedule changes we will inform you.
 - From Monday until Wednesday big machinery will be operation on the river bank so we request that you do not access or use the river bank area around the feature at all on these days. On Thursday we will be setting up the platforms this should be a quick process and we hope to open the river bank as soon as possible once it is complete.
 - The hole will be open for training during this time. However if at some point there is a need to temporarily close the hole the people in charge of the works will inform the paddlers. We don't foresee this happening for long (if at all)

- River bank right
 - A put in area is being prepared and will be available on the river right bank for use on these days whilst the left bank is closed.

PROVISIONAL PUT IN FROM 17TH TILL 19/20TH JUNE

- On Wednesday 19th the constructions of the grandstands will start, and the bridges to the islands. The construction of the grandstands will not effect the right right put in. Please use this put in to access the Worlds feature.
- Paddlers will be able to paddle on the narrow channel to come back to the put in as one of the worlds done tomorrow will be stop the water flowing down this channel.

WATER LEVELS:

The HOC has informed us that the water levels will be guaranteed from the 24th for the official training schedule. Prior to this we will be informed on a daily basis of the water levels for the next day.

- On Monday and Tuesday the HOC in coordination with the power company, that control the release, will be doing the final tests of the ideal water levels, so Monday from around 11:30 the water level will be stable for the whole day until at least 17:00h. On Tuesday a different water level will be tested (-5m3) to evaluate the best level and fix the water level for the competition.
- Tuesday afternoon once the level decided we will let you know the water schedule for Wednesday and every day we will let you know the water schedule for the following day.
- On Wednesday the 19th the ICF Freestyle committee will also publish the training tables for the official training period, from 24th until 28th June and the 30th June.

We will keep you posted of any other changes or adjustments that are made during this coming week.
